- ___ Spay or Neuter

Microchip your pet! It could save their life and bring them home!!

75-85% of pets over the age of 3 have dental disease! Dogs and cats are NOT supposed to have bad breath. Brushing your pet's teeth is beneficial for both your pet and your wallet. Dental disease can be costly, not to mention painful and harmful to your pet. Please ask us about other preventative options.

Published research shows that more than **20%** of pets brought in for annual checkups have an underlying issue. Twice-yearly exams let us detect problems early, when more treatment options are available

1-6 Years _____

- ___ Comprehensive physical exam
